To Whom It May Concern -

The MPS Medical Pharm Pump III was officially released by MPS Medical in January of 2018. The changes from the previous Pharm Pump II model to the Pharm Pump III were purely cosmetic (e.g. housing color change) for an updated look and product branding. The materials of construction and operations, including major electronic components, and Menus and Operating Manual, are the same between Pharm Pump II and Pharm Pump III models.

In an effort to minimize operational interruptions to our supply chain for this cosmetic changeover to MPS Medical, some overlapping materials including the shell, pre-programmed branding saved onto chip sets, and special identification labels may be utilized as a mix of Pharm Pump II and Pharm Pump III items until such materials are fully exhausted from our inventory.

The mixture of such items will not affect the form, fit, or functioning of this product.

Thank you,

MPS Medical, Inc.
